Software: Jupyter Notebook, Git, GitHub, VS Code, Atom, Figma
Certifications: Google Analytics Beginner Certified, ALX-T Udacity Data Analysis Certified

EXPERIENCE

Digital Marketer, **Joyce African Hair Braiding,** Harvey, IL   October 2020 – Present
- Created and designed a website to optimize search engine placement, significantly increasing outreach to potential clients and leading to daily customer patronage
- Led the business from a startup to averaging 5,000 views and 450 profile interactions per month on its Google profile
- Conducted in-depth research on social media marketing and search engine optimization, resulting in increased user interaction and foot traffic to the storefront

FutureForce Tech Launchpad Full Stack Intern, **Salesforce,** San Francisco, CA   June 2023 – August 2023
- Proficiently utilized cutting-edge technologies and frameworks, including APIs, Node/Express.js, SQL, Postgres, and Git, to develop a robust final capstone project
- Achieved a return offer from Salesforce as a result of successful completion of the final capstone project

Backend Developer, **Wesleyan University**, Middletown, CT   October 2022 – June 2023
- Assist in maintaining my school's "OurCampus" app's back-end to maintain the app's security and efficiency
- Update existing systems to make sure the application is up to Google Play and Apple's app store's standards

IT Intern, **Mokena School District 159**, Mokena, IL   June 2022 – August 2022
- Played a key role in the overhaul of the school district's technology ecosystem, replacing approximately 40 projectors with modern EdTech solutions including smart TVs and Chromeboxes
- Acquired proficiency in re-imaging teacher computers, ensuring they were equipped with the necessary software for the upcoming school year

PROJECTS

Cashflow Academy, **Co-Creator**   PERN Stack, Chakra UI
- Conceptualized and developed a comprehensive web application aimed at imparting financial literacy to individuals in low-income communities and early career professionals
- Leveraged the power of the PERN Stack (PostgreSQL, Express, React, Node.js) along with the Chakra UI frontend framework to craft an engaging and personalized/gamified user experience
- Implemented Agile Methodologies and conducted Sprint Planning to strategize and develop the Minimum Viable Product
- Presented the application as the final capstone project during my internship with Salesforce, ultimately leading to a return offer

Uno, **Creator**   Python
- Built a terminal application that allows users to play the popular game, Uno, with another player or a computer
- Utilized Python to implement game logic and input handling

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

President, **African Student Association (ASA)**, Middletown, CT   August 2023 – Present
- Propose, plan, and execute events for the African Community with the goal of uniting African students on campus, promoting cultural heritage, and bringing awareness towards issues plaguing the continent
- Lead 4 other board members in the logistics of planning events, financing, and community building for our members
